Getting Ready for Change Self-Assessment

What is the purpose of this tool? This tool can be used to assess your hospital's organizational infrastructure and its readiness to support effective implementation efforts. Using this checklist, you can highlight capabilities that should be in place within your hospital before implementing improvement efforts related to the AHRQ Pediatric Quality Indicators (PDIs). These capabilities are organized into two evidence-based domains:

- 1. **Infrastructure for Change Management,** to evaluate how ready your organizational infrastructure is to support quality improvement in general.
- 2. **Readiness To Work on the AHRQ Pediatric Quality Indicators,** to evaluate your organization's readiness to improve its performance specifically on the AHRQ PDIs.

Both domains are important to effectively implement change. Within each domain, we identify related dimensions that you should consider in assessing your hospital's status. Feel free to shorten or modify the checklist to best suit the needs of your hospital.

Who are the target audiences? Senior executives and trusted mid-level managers. It can be useful to have several senior executives review this tool independently. This includes, at a minimum, the chief medical officer, chief quality officer, nursing leadership, and members of your hospital's quality committee. It may also help to have feedback on these items from trusted mid-level managers, since they may bring alternative viewpoints and may have better knowledge of operational issues.

How can it help you? One of the first steps in successful change is to determine how ready the hospital is to undertake meaningful changes in the way it operates. Identifying and addressing barriers to change will improve your hospital's success in implementing successful performance improvements.

How does this tool relate to others? This tool helps you assess how prepared the hospital organization is to implement improvement initiatives for the AHRQ PDIs, which is a factor to consider in the *Gap Analysis* (Tool D.5). It also can guide your choice of other tools to address areas that you find need strengthening. Examples include *Applying the AHRQ Pediatric Quality Indicators to Hospital Data* (Tools B.1, B.2, B.3) and the *Prioritization Worksheet* that is used to identify priorities for improvement actions (Tool C.1). While not part of this toolkit, AHRQ's Hospital Survey on Patient Safety Culture may help you assess your hospital's readiness for change (see http://www.ahrq.gov/professionals/quality-patient-safety/patientsafetyculture/hospital/).

What should each person do?

- For each key concept, each individual should rate the extent to which the statement characterizes your hospital: Not at all, to some extent, or to a great extent.
- Complete both section 1 (Infrastructure for Change Management) and section 2 (Readiness To Work on the AHRQ Pediatric Quality Indicators).
- Note any particular concerns in each area to facilitate later discussion.

How do we review the results together? Once the individual reviews of the checklist are complete, schedule a meeting of the hospital's key leaders. The discussion at this meeting should focus on areas where your infrastructure needs strengthening or where there is a lack of consensus.

- For section 1, Infrastructure for Change Management, discuss the greatest vulnerabilities for your hospital, those that are most likely to cause quality improvement efforts to fail. Based on this discussion, identify an action plan with specific steps, individuals responsible for each step, and a timeline for revisiting progress.
- If your hospital does not use the AHRQ PDIs, consider your experience with other quality metrics when reviewing section 2.

Section 1. Infrastructure for Change Management This section will help you evaluate how ready your hospital is to support quality improvement actions.

To what extent does each statement characterize your hospital?	Not at all	To some extent	To a great extent
1a. Quality and safety as priorities			
 We have a shared sense of purpose that quality and safety are our highest priorities. 			
 Quality and patient safety are included in our hospital's main goals or pillars of performance. 			
 The governing board is actively involved reviewing our hospital's performance on quality and patient safety measures. 			
 We have open communication among providers, staff, patients, and caregivers about quality and patient safety. 			
Overall, our hospital's organizational structure places a high priority on quality and patient safety.			
My concerns in this area are:			
1b. Management processes			
 Our management processes emphasize meeting quality performance standards and provide the resources we need for supporting quality improvement. 			
 We have an anonymous, nonpunitive way of reporting events and errors. 			
 Our leadership responds actively when patient safety issues are identified. 			
 We document patient safety standards in protocols and guidelines that are clear and easy to understand. 			
 We disseminate the protocols and guidelines widely within the hospital. 			
Overall, our hospital's management processes are designed to place a high priority on quality and patient safety.			
My concerns in this area are:			
 1c. Senior leadership Everyday events are connected to our larger purpose through 			
stories and rituals.			
 Our governance structures and practices minimize conflict between our hospital's multiple missions and priorities. 			
 Our hospital is led as an alliance between the executive leadership team and the clinical department chairs. 			
Overall, senior leaders within our hospital are passionate about service, quality, and safety and have an authentic, hands-on style.			
My concerns in this area are:			
1d. Training We provide ongoing training for staff that helps them build skills to improve quality and patient safety. My concerns in this area are:			

Pediatric Toolkit for Using the AHRQ Quality Indicators How To Improve Hospital Quality and Safety

To what extent does each statement characterize your hospital?	Not at all	To some extent	To a great extent
1e. Accountability			
Our hospital provides incentives or rewards (financial or			
nonfinancial) for high levels of patient safety.Our medical leaders (such as department chairs or medical			
directors) accept responsibility for quality and safety within their			
departments.	_	_	_
 We have accountability, innovation, and redundant processes to ensure quality at the unit level. 			
 Our hospital has a policy of transparency, and information is 			
shared at all levels (from top to bottom and vice versa).			
Overall, our hospital holds senior leaders accountable for service,			
quality, and safety (e.g., CEO, COO, CMO, CNO, CFO, CQO, CIO). My concerns in this area are:			
1f. Data systems Overall, we have effective data systems: they are functional and			
allow us to obtain data when we need them.			
My concerns in this area are:			
1g. Results focused			
We continuously strive to improve and we benchmark our			
performance against external standards as a measure of success.			
 In decisionmaking, we focus on the likely results to guide our choice of performance improvement approach, rather than always 			
following a particular approach (such as Six Sigma).			
We emphasize human behavior and work redesign as the keys to			
 Improvement. We use technology as an accelerator and not as a substitute for 			
work redesign.			
Overall, we are driven to focus on results.			
My concerns in this area are:			
1h. Collaboration			
 The relationships between administration, providers, nurses, and other staff are typically collaborative in our hospital. 			
 We provide frequent recognition of employee contributions at every 			
level.			
 Employees value each other's critical knowledge when problem aching 			
solving.We have a sense that teamwork among staff is encouraged.			
Overall, we have a sense of collaboration among all staff to improve			
patient safety.			
My concerns in this area are:			

Section 2. Readiness To Work on the Quality Indicators

This section will help you evaluate your organization's readiness to improve its performance specifically on the AHRQ Pediatric Quality Indicators. If your hospital does not currently use the AHRQ Pediatric Quality Indicators, it may help to consider your experience in working with and improving performance on other quality metrics.

	Not at	To some	To a great
To what extent does each statement characterize your hospital?	all	extent	extent
 2a. AHRQ Pediatric Quality Indicators as a priority We have a shared sense of purpose to decrease mortality and reduce complications in children. 			
 We have open communication among providers, staff, patients, and caregivers about our work on the Pediatric Quality Indicators. 			
 Our hospital leadership responds actively when we identify issues related to the Pediatric Quality Indicators. 			
 Our hospital leaders emphasize the need for high performance on the Pediatric Quality Indicators. 			
 We document safety standards related to the Pediatric Quality Indicators in our protocols and guidelines. 			
 We continuously strive to improve our performance on the Pediatric Quality Indicators. 			
Overall, our hospital places a high priority on the AHRQ Pediatric Quality Indicators.			
My concerns in this area are:			
2b. Experience with the AHRQ Pediatric Quality Indicators			
We include one or more of the Pediatric Quality Indicators in our			
existing set of quality and safety performance measures.			
 We review trend data on one or more of the Pediatric Quality Indicators on a regular basis in the hospital's performance 			
 monitoring process. We have undertaken quality improvement initiatives to address 			
performance on one or more of the Pediatric Quality Indicators.			
 We review and analyze everyday events related to the Pediatric Quality Indicators to identify areas where improvements are 			
needed. Overall, we have experience working with the AHRQ Pediatric Quality			
Indicators.			
My concerns in this area are:			
2c. Accountability			
Our hospital provides incentives or rewards (financial or			
nonfinancial) for performance on the Pediatric Quality Indicators.			
 Our medical leaders (such as department chairs or medical directors) accept responsibility for the Pediatric Quality Indicators within their departmente. 			
within their departments. Overall, we hold ourselves accountable for performance on the AHRQ Pediatric Quality Indicators.			
My concerns in this area are:			

Pediatric Toolkit for Using the AHRQ Quality Indicators

How To Improve Hospital Quality and Safety

To what extent does each statement characterize your hospital?	Not at all	To some extent	To a great extent
 2d. Data systems Our hospital maintains a database of discharge records using the 			
Uniform Billing Code system, which can be used to track discharge records on each patient individually for the last 4 or 5 years.			
Overall, our data systems have the needed capability to support quarterly monitoring of AHRQ Quality Indicator performance, or we have the ability to obtain this Quality Indicator information from another source.			
My concerns in this area are:			
<i>2e. Training We provide ongoing training for staff on the AHRQ Quality Indictors and what they mean.</i>			
<i>My concerns in this area are:</i>			

Section 3. Role in Quality Improvement

Please indicate which of the following describe your role in quality improvement efforts at your institution (check all that apply)

] Senior leadership

Quality improvement team or committee

Frontline staff (e.g., RN, MD, NP, RT)

Other (specify):
