

Affinity Group:

Leveraging Data to Enhance your CR Program

Hicham Skali, MD, MSc

November 12, 2020

Agency for Healthcare Research and Quality

Welcome and TAKEheart Update

- TAKEheart training activities will resume as early as April 2021 and pick up with the third training module in the series
- Several re-start activities are planned between now and next April
 - Cohort 1 Partner Hospitals are asked to complete a data planning exercise to lay groundwork for automating referrals
 - Cohort 2 Partner Hospitals are asked to complete a Readiness Assessment to help us better prepare to support you
- Ongoing offerings of affinity group sessions on priority topics for the learning community. Events are open to anyone but participants are encouraged to join the TAKEheart Learning Community at: <u>https://takeheart.ahrq.gov/join-takeheart</u>
- TAKEheart website remains available with added information and links to COVID-19 resources (https://takeheart.ahrq.gov/coronavirus)

heart AHRQ's Initiative To Increase Use of Cardiac Rehabilitation

TAKE

Today's Event

- Background: TAKEheart affinity groups (AG) provide forums for participants to learn from and share with each other on priority topics. Everyone LEARNS, everyone SHARES, everyone SUPPORTS.
- Purpose of Today's Call:
 - Continue process of learning and sharing with each other
 - Focus of today's conversation: Explore how CR programs are effectively accessing, monitoring and using data to benefit their patients and operations
- Format: Moderated panel discussion using the chat and polling features to dialogue with participants and allow peer-to-peer sharing

Today's Experts

<u>Moderator</u> Hicham Skali, MD, MSc

TAKEheart Principal Investigator, Associate Director of the Cardiac Rehabilitation Program at Brigham and Women's Hospital, Division of Cardiovascular Medicine

TAK

<u>Panelists</u> Matt Thomas, MS, MBA, ACSM-CEP, Cardiopulmonary Rehab and Employee Fitness CHI – Memorial Hospital, Chattanooga, TN

Julianne DeAngelis, MS CCRP, CEP, Lifespan Cardiovascular Institute, Miriam and Newport Hospitals, Providence, RI

Question 1: What best describes the current status of your hospital's CR program?

Please select your answer here

Question 2: How would you describe the level of uncertainty about the financial and operational challenges your CR program may experience in 2021?

Please select your answer here

Question 3: What electronic medical record (EMR) system is used in your hospital?

Please select your answers here

Overviewing Today's Discussion

Growing value of data to CR programs

Assessing the data you have

Assessing the reports you can generate

Maximizing the value of your data and reports

TAKE heart AHRQ's Initiative To Increase Use of Cardiac Rehabilitation

The Growing Value of Data to Your CR Program

 Timely responses to emerging needs and a changing environment require current and accurate data

- Financial constraints increase the need to demonstrate the value and efficiency of your operations
- Effective care coordination depends on knowing your patients and how their needs are changing
- Automatic referrals require accurate and up-to-date data

So data matters for everyone, and is essential for participants in TAKEheart!

Question 4: Which of the following types of patient-level data does your program have that is complete, accurate and current for potentially, eligible CR patients? (Pick as many as apply)

Please check all of the data types you can access here:

Worthwhile Data for CR Programs to Access

What data should CR programs have access to, and why?

Patient-Level Data

CPT codes

ICD-10 diagnosis & procedure codes

Age & Gender

Using Reports and Queries to Enhance Your Program

How can CR programs maximize the value of the data and reports they have access to?

Advice from Panelists and Responses to Comments

- Advice for programs not as far along with data
- Responses to chat comments and questions

Introducing the TAKEheart Data Planning Resource

- What it is: A guided process for assessing your data capabilities and needs
- Why you should use it:
 - To identify opportunities for enhancing your collection use of data
 - To prepare TAKEheart participants for resuming learning modules in the spring. You can't implement automatic referral without access to data
- How you should use it:

TAKE

- Resource will be emailed or can be obtained online
- Review it yourself
- Discuss it with key stakeholders
- Identify next steps and start working on them
- TAKEheart participants should submit a completed plan by <u>Dec.</u>
 <u>18</u>

Resources Mentioned in Today's Event

Information on AACVPR Data Registry available at:

https://www.aacvpr.org/Portals/0/CR-Registry FAQs.pdf

The TAKEheart Data Planning Exercise will be circulated by email

Affinity Group Wrap-Up

- Next call: CMS Final Rule and Strategic Planning for 2021. Thursday, Dec. 10 at noon ET.
- Continue discussions of key topics with peers at: <u>https://takeheart.ahrq.gov/collaboration</u>
- Today's slides and an event summary will be emailed to event participants and posted online at: <u>https://takeheart.ahrq.gov</u>
- Please complete the popup feedback questions so we can see what worked well and where we can improve.
